In a monitoring season which fell foul of Covid19 lockdowns this record of our butterflies has been compiled. Images focus on species rarer in our catchment. Consider changes: some maybe pandemic-linked but not all?

- Column numbers are now survey week numbers, not transect section numbers.
- Blocks indicate species presence in transect in that week.
- Numbers in blocks refer to numbers of insects in whole transec

- Number in final "Total" column refers to total number of species seen in the season.
- Sightings refers to number of individuals of that species recorded in the season.
- Season % refers to proportion of weeks / 26 week season when species was present

BUTTERFLIES of CLIFTON & DURDHAM DOWN 2020 **Species unusually** low in number this year compared to previous seasons:
